

Date: 16.09.2025

Dear Channel Partners,

This letter is to inform you about the recent changes in the Goods and Services Tax (GST) rates on pharmaceutical products from 12% to 5%, as recommended by the GST Council. These revisions, which take effect from 22nd September 2025, are intended to provide benefits directly to the end consumer.

Furthermore, the National Pharmaceutical Pricing Authority, in its office memorandum dated 12th September 2025 and 13th September 2025 have stated that it is not mandatory for to recall, relabel or resticker on the label of container or pack of stocks in the market released prior to 22nd September 2025 if we are able to ensure price compliance at the retailer level through communication in this regard.

As a valued channel partner, your role is crucial in ensuring that this tax reduction is implemented effectively and transparently across the supply chain. We want to work with you to ensure a smooth transition and that consumers receive the full benefit of this revision without delay.

To ensure full compliance and pass on the benefit to consumers, we request you take the following immediate actions:

1. **Revised Pricing:** Implement the revised pricing reflecting the new, lower GST rates for all affected products from 22nd September 2025 onwards. We have provided the updated price list attached as Annexure - 1 for your reference.
2. **Input Tax Credit Understanding:** This change will lead to GST input credit in your respective GSTIN account to the tune of inventory lying at your end the said additional GST will be available to you for a set of against your output liability over a period of time stop any inventory purchased at the earlier 12% GST rate will still retain its full its CCG eligibility while the selling rate may now be at 5% GST the accumulated credit remains valid and can be adjusted overtime therefore no financial loss will be incurred to due to this transition.
3. **Communication:** Communicate this price change to your retailer network to ensure prices are corrected at the point of sale and revised prices are informed to end consumers.
4. **No Profiteering:** We must collectively adhere to the anti-profiteering measures under the GST law, which require that the benefits of reduced tax rates are passed on to consumers.
5. **Continuous supply of our products:** Kindly ensure that the regular purchase cycle from your end is continued, and adequate inventory levels are maintained at your end so that there is no shortage of the pharmaceutical products on the market and the Company's supply of pharmaceutical products remains undisrupted.
6. **Trade margin protection:** That the revision of MRP due to downward revision of GST rates will not impact your existing trade margin structure and there will be no change in PTR and PTS except change in MRP.

INUEN HEALTHCARE PVT. LTD.

Block-B, 504 to 508, Inceptum, B/h Tranquil, Opp. Planet Landmark Hotel,
